

# Making the Invisible Visible

## Session 01 – Digest

Fall 2025 & Spring 2026

- Start by acknowledging the systemic bounds and understand your degree of latitude: the “performance funding metrics” of USG or the “Approved Software List” of Augusta University are not elements you can (easily) change.
- Make sure your workstation will not ruin your health:
  - (re)Learn to (touch) type
  - Adjust the height of your screen
- Practise universal design as much as you can, by communicating using multiple file formats and media.
- Embrace structured procrastination: if a task is daunting, try to remain efficient by completing other tasks (this is how pandoc was born).
- Leverage existing good practise, such as faculty peer review: you will learn in the process and possibly help colleagues through e.g. tenure and promotion.
- Improve your browsing experience by trying to hide cookies pop-up and advertisement, for example using
  - a firefox add-on to remove cookies pop-up,
  - a firefox add-on to hide advertisement
